PORTABLE AND MOBILE CYLINDER EQUIPMENT

GAS EQUIPMENT EXAMINATIONS

CP7 / CP47

Examinations carried out and certificates issued by qualified R H Davey staff, with training from Weldgas / Weldfast.

WHICH EXAMINATION DO I NEED?

BCGA CP7

Portable oxy-fuel sets

Choose CP7 for a portable or mobile oxygen and fuel-gas set, such as oxy-acetylene or oxy-propane for welding, cutting, brazing or heating.

BCGA CP47

Individual cylinder supplies

Choose CP47 for a portable or mobile cylinder supply controlled by one cylinder-mounted regulator, such as argon or an argon mix for MIG or TIG.

WHEN TO ARRANGE AN EXAMINATION

Schedule examinations at least once a year, or more often where your risk assessment, operating conditions or manufacturer guidance require it. Arrange a further examination after an incident or change that may have affected safety.

For fixed pipework or a manifold-fed system, tell us about the installation so we can discuss the appropriate scope.

BOOK A GAS EQUIPMENT EXAMINATION

Send your site postcode, number of sets, gases in use and any previous examination records.

R H DAVEY EXAMINATION SERVICE

WHAT WE CHECK

We confirm the scope for your equipment and the gases in use before examination.

01

Set-up and condition

We check that the equipment is suitable for the gas and duty, correctly assembled and in serviceable condition. Items may include regulators, gauges, hoses, fittings, flashback arrestors and torches.

02

Leak and function checks

We check for leaks and verify operation where applicable. We also check component markings and service-life limits against the manufacturer's guidance.

03

Findings and certificate

We record what was examined and flag defects, corrective actions and components due for replacement. We issue an examination certificate for equipment assessed as serviceable.

Continue routine checks before and after use. Take unsafe equipment out of service until the fault has been addressed.

WELDGAS / WELDFAST TRAINING

Operator training

For staff who set up and use oxy-fuel equipment. Covers hazards, checks before use, safe operation and shutdown.

Inspector- and trainer-level training

Ask R H Davey about Weldfast's two-day inspector programme, one-day recertification or on-site training.

Email R H Davey about Weldfast training

REPLACEMENTS AND INSPECTION EQUIPMENT

Ask us to match replacement regulators, hoses, arrestors or torches to your set. For the Weldgas CP7 gas inspection kit, quote GAS5152.
